

In response to the significant changes to the FAFSA – and the implementation of new state financial aid programs (i.e., Cal Grants for Students with Dependents) - the following fields will be added to our CSS file requests for the Financial Aid Data file beginning with the 2022-23 academic year. These fields will support UCOP’s ability to accurately report, analyze, and model changes to student demographics and the impact of new aid policies and programs, including the shift from using the Expected Family Contribution to the Student Aid Index. Furthermore, the fields will enhance the Office of the President’s ability to accurately distribute financial aid resources under the Education Financing Model (EFM). We recognize that you supply large amounts of data currently, and we appreciate your ongoing assistance and support of the EFM.
