

# Tableau QA Server or UAT Server, Private or Public Site: What Does This All Mean?

Ensure that you place your viz in the right folder as the migration to PROD happens by project

Ensure that you place your viz in the right folder as the migration to UAT happens by project

If viz originally intended for IRAP view is deemed Information Center eligible

Ensure that you place your viz in the right folder as the migration to PROD happens by project

- **Tableau Private Site** – Products that contain sensitive data, are not ready for public consumption as collaboration is needed from UCOP Partners, OP Senior Leadership and Campuses
- **Tableau Public Site** – Products that are deemed non-sensitive or Information Center applicable (of interest to the public)
